

Van Buren State Park

Naturalist Programs

Saturday, September 11, 2:00pm • Soaring With Monarchs"

Join ODNR Naturalist Natalie Miller at the Nature Center for a program all about monarch butterflies. Participants will learn about this familiar insect's life cycle and migration, and things they can do in their own backyard to help the preservation of this and other butterflies. Then caravan a short distance to the park's butterfly garden and rearing gazebo to see butterflies tagged and released for their annual migration to Mexico.
