Largemouth Bass **OUTLOOK: GOOD**

Lake Vesuvius supports good numbers of largemouth bass in addition to good size structure. Ninety-four percent of the bass captured during the 2007 electrofishing survey were 12-inches or larger, 61% were 15-inches or larger.

Bluegill **OUTLOOK: POOR**

Catch rates were poor for bluegill in the 2007 electrofishing survey. In addition to low catch rates, the population is comprised of small individuals. Only two percent of the fish captured were six-inches or larger.

NOTES:

Channel catfish are stocked in alternate years but the population has not been investigated. Catchable rainbow trout are stocked in the early spring.
